*All gauge models will respond to negative pressures.
**0.15% FS for 10 psi (700 mbar) range.

Burst Pressure

Burst pressure is 2x working pressure (exception, 20,000 psi [1400 bar]; burst pressure 29,000 psi [2000 bar]).

Selectable Pressure Units

kPa, MPa, kg/cm², psi, mbar, bar, inHg, inH₂O, mH₂O, mmH₂O and mmHg

Display

- Pressure reading: 5 digits with 0.5 in (12.7 mm) character height
- Full scale indicator: 2.5 digits with 0.25 in (6.35 mm) character height

Pressure Bar Graph

In addition to the numeric pressure indication, the DPI 104-IS LCD display contains a round twenty segment bar graph to provide the user with a quick visual estimation of pressure from 0 to 100% full scale output. The bar graph increments represent 5% of the user-selectable range.

Display Update

Two times per second

Minimum/Maximum Values

The minimum and maximum pressure values can be displayed on the DPI 104-IS. This function can be enabled/disabled and reset by the user.

Switch Test

The DPI 104-IS features a switch test function that will capture and display the open and closed values from an external pressure switch. Maximum switch impedance 200 Ω.

Alarm Output

The alarm output consists of an open drain field effect transistor (maximum current 22 mA, maximum voltage 16.9 V).

Adjustable Mounting Positions

For added convenience, the DPI 104-IS housing will rotate 320° around the pressure fitting and the faceplate can be rotated in any orientation for optimum visibility.

Menu Lock

To guard against unauthorized menu access, the DPI 104-IS features a menu and tare lock function.

RS232 Interface

Serial communications are provided to allow transfer of data to a PC with the optional serial lead P/N IA-4090-2-V0 (safe area only). Using this link all menu commands and display data are available via an ASCII command set or the optional SiCalPro software.

Network Capability

Up to 99 DPI 104 IS instruments can be connected together in a daisy chain configured network (safe area only).
