# Baseline Market Segments

Baseline – MOCON, Inc. was established in 1969 in the Rocky Mountains of Colorado.

The administrative offices, service center, research and development laboratories are located at our headquarters, just north of Boulder, in Lyons, Colorado.

Baseline – MOCON manufactures a full line of advanced gas monitoring instrumentation and employs a staff of engineers and scientific specialists.

## Products include:

- Total Hydrocarbon / VOC Analyzers
- Gas Chromatographs
- PID Sensors
- Accessories
- Custom Application Services

## Applications include:

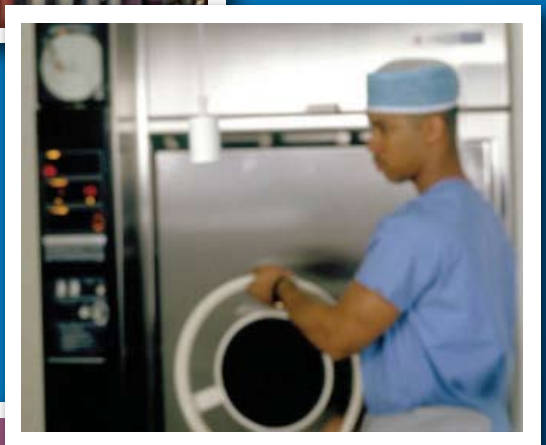

- Process industrial gases
- Worker health and safety
- Environmental
- Resource management and exploration

Baseline-MOCON's mission is to apply our unique technologies of gas detection, measurement, and analysis to niche markets worldwide.

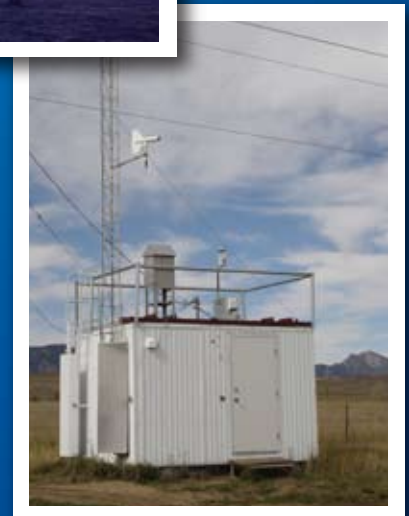

**Trace impurities in Specialty and Industrial Gases**

**Indoor Air Quality Monitoring of toxic gas in the workplace**

**Mud Logging during oil and gas exploration**

**Outdoor Air Quality Monitoring of emission sources and ambient air networks**

## Baseline-MOCON's Products include:

### Model 8900

Gas Chromatograph  
Online Automated GC  
Specific to one or more gasses

### piD-TECH<sup>®</sup> plus

PID Sensor  
Plug In, Miniature  
0-20ppm or 0-2000ppm

New

### Series 9000

Total Hydrocarbon / VOC Analyzer  
Sub ppm to Percent Concentrations  
Non-Methane, Total Carbon and Multipoint Options

Accessory

### Series 8990

Permeation Calibrator

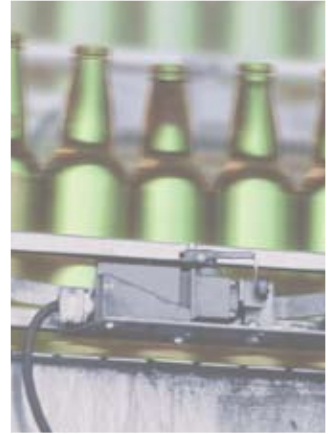

Accessory

### Series 8950

Multipoint Sampler
